

CONTROL PANEL T6 NOT DRILLED

Art.no: 16-647101

Model-specific panel for Volkswagen Transporter T6 designed to be mounted in the space to the left of the steering wheel. Compatible with all our 20 mm switches and indicator lights. Attach the bracket by gently pressing the milled part into the upper edge of the coin tray, then snap the lower part of the bracket into place. Can be removed without damaging the dashboard. Also available with seven pre-drilled holes variant, so you can easily push out the holes you need. NOTE: Delivered without buttons or lights.
