

CANM8 DUO SMARTVIEW SPEED INTERFACE

Art.no: 12-0001257

Complete your Lazer Triple-R Smart View 12-0001255 with a speed interface to control the speed-adaptive light pattern. The unit reads both vehicle speed pulse and high beam pulse. Compatible with Volvo. For connecting extra lights on newer cars lacking a 12/24 V positive signal or having a pulsed signal (PWM). The Canbus module reads the high beam signal in the car's canbus system and then converts the signal into an analog 12/24 V positive signal. Additionally, an extra light wiring kit is needed to turn on the extra light or LED light bar. The module is connected to the Can Bus wiring inside the car's cabin.
