

INVERTER PURE SINE 24V/3000W

Art.no: 22-243000

Inverters are often used in cars, vans, and mobile offices to power 230V equipment such as power tools, chargers, and work lighting. Provides 230VAC / 3000W pure sine wave. It also has two front USB ports 5V/2.1A. Pure sine wave means it provides the same type of voltage as a regular wall outlet. The inverter includes features such as low and over-voltage protection, overload protection, and overheat protection. For control panel, see article 22-24000.

Technical information

Voltage	24V
Effect	3000W
Dimensions (LxHxW)	454 x 143 x 272 mm
Load output	3000 W
Weight (kg)	10.700000
