

## DIGITAL WIRING HARNESS LIGHTNING 1200

Art.no: 16-651200

DIGITAL LIGHTNING 1200 is the new generation lighting kit for CAN-controlled headlights. It's a digital wiring harness for retrofitting additional lights. With the included USB drive, the correct software for the vehicle model can easily be downloaded from Modernum's website and transferred to the product. Like previous digital kits, Digital Lightning 1200 includes a digital control unit with a fused harness. The kit also includes a DT connector for easy connection to LED light bars or other additional lights. Easy to install, all work is done in the engine compartment. Complete wiring harness, everything is included in the kit. Does not generate error codes. High quality, all cables are vehicle-specific.
