

## LAZER GLIDE BRACKET LIC.PLATE

Art.no: 34-00086

To facilitate the installation of the curved Lazer Glide 20" light bar, we offer a license plate mount. The kit is compatible with a bar mounted above the license plate and enables a discreet installation, with mounting brackets barely visible behind and below the light. The two-part construction (at each end of the light) fits into pre-drilled, threaded holes on the underside of the bar, providing a secure and robust installation. Comes with A2 stainless steel fasteners to secure the brackets to the light, and the mounting of the plate to the vehicle is completed with the included rivets or thread-forming screws.

### Technical information

Brand	Lazer
Weight (kg)	1.500000
